

Arrowhead Architectural Committee
February 20, 2007

In attendance: Adam Kral, Mark Rasmus, Richard Cothorn, Bruce Wholf, Jim Schwarzkopf, Terry Moore and Holly Bristoll.

A motion by Mark Rasmus to approve the minutes of the January 16, 2007 meeting was seconded by Terry Moore and carried.

Adam Kral opened a discussion about signage, previously approved via email. He asked if anyone had a problem with the email approvals for signage within the parameters. Everyone was in agreement with Adam.

Tom Monagan of Tomahawk Development, Martin Gregory of Signature Associates and Steve Crum of Fox News submitted a request for either a monopole or tower for microwave transmission. Either structure would have 150 foot maximum height with the base being either 6 or 9 feet. The base of the structure would be screened and landscaped. The request was for the structure to be located at the east end of 1720 Indian Wood Circle. After discussion Terry Moore moved approval of either the monopole or tower to be installed at the east end of 1720 Indian Wood Circle, as presented, noting there will be proper screening at the base of the tower. Holly Bristoll seconded the motion, which carried unanimously. There was discussion regarding the satellite dishes on the roof, as well as a necessary generator and roof access ladder. These will be presented at a later date.

There being nothing further, the meeting adjourned at 9:15 AM.

Respectfully submitted,
Karen Barker
